Reference/inspiration websites

https://www.smi.ski/ (official smiski collection tracker)
- Categorized by blind box series number and name
- All characters are dull in colour and somewhat transparent
- When you click or tap on the figure you have it makes the picture opaque and full opacity
- It saves your progress
- Simple interface

https://sonnyangelusa.com/pages/sa-app-points (offical Sonny Angel app tracker)
- Categorized by blind box series in a list format
- You have to click on the specific series to see the figures
- All characters are dull in colour and somewhat transparent
- When you click or tap on the figure you have it makes the picture opaque and full opacity
- However, you have to upload a photo of the sonny for it to be coloured
- Saves your progress cause you have to make an account
- Multiple page interface
- Only available on mobile

https://www.coleka.com/en/collector-action-figures/pop-mart/azura-fantasy-nature_r36872 (popmart collector)
- Categorized by blind box series in a list format
- You have to click on the specific series to see the figures
- Once you click into the figure series there are photos with a green rectangle with a + sign
- You click that to add to your collection
- Once you add everything you have you can save your collection
- It doesn't have all series

https://kprofiles.com/ (archive of K-pop groups)
- Since this archived website has a lot of information it has many drop-down menus
  - It's a simple user-friendly drop down-down list which I want to add to my website

https://sukoshimart.com/ (shopping website)
- Pictures change when you hover over them
- When you hover over the buttons they change colour
- Same thing goes for when you hover over the item names
- When you hover the certain categories like makeup it underlines the text
  - I like the idea of text/buttons changing colour and want to incorporate that in my website

https://miniso-ca.com/ (miniso official website)
- The buttons also change colour when hovered on
- Simple drop-down menus

https://www.popmart.com/ca (popmart blind boxes official website)

- Has a big animated picture that automatically swipes through new arrivals on blind boxes and various series, people can also click through the slides
- Viewers can also click on the picture and it will lead them to the specific series
    - Perhaps I would like to include this on my website

https://www.kikagoods.com/ (blind box online store)
- When you hover the picture grows bigger and the text under changes colour
    - Maybe I will have my pictures on my website get bigger to make it look more interesting

https://kiokii.com/ (shopping website)
- The button and picture go upwards when you hover over them
- The button also changes colour when hovering over it
- Depending on the picture it will also change when you hover over it

https://kpopworld.ca/collections/new-arrivals (k-pop album shop)
- The drop-down menus change colour when you hover over them
- When you are on a certain part of the menu the text stays underlined to indicate what part of the website you are on
- The drop-down menu is simple and easy to use
- The text under the drop-down menus change colours when hover over them
